

AIM : First Palindromic String in an Array and find its completeness

```
main.c Run ▶ Output
#include <stdio.h>
#include <string.h>

int isPalindrome(char str[])
{
    int i = 0;
    int j = strlen(str) - 1;

    while (i < j)
    {
        if (str[i] != str[j])
            return 0;

        i++;
        j--;
    }

    return 1;
}

int main()
{
    // ... (array of strings) ...
}
```

First Palindromic String: madam

RESULT: The first palindromic string in an array has been found successfully
